SOUND DESIGN AND SAMPLE CONTENT:

Ivo Ivanov : WEBSITE

PRODUCT GRAPHICS:

DMAS3

ABOUT US:

Glitchmachines was established in 2005 by sound designer Ivo Ivanov. For the first 5 years of our brand's existence, we were focused on building handcrafted circuit-bent hardware instruments. We sold a limited number of units through boutique synthesizer retailers Analogue Haven and Robotspeak in California and we custom made instruments for numerous high-profile artists and sound designers. In 2010, we shifted our focus toward creative software plugins and sound effects packs.

LEGAL:

Piracy directly affects us! We need your support to be able to continue to bring you new products - please do not share our plugins and packs illegally.

For full Terms & Conditions, please refer to the EULA (End User License Agreement) located in the DOCS folder with this product or visit the Legal page on our website.

SUPPORT:

Our download links expire after 10 attempts for security reasons but you can always contact us to request a new download via email: sales@glitchmachines.com

If you require tech support, you may reach us at: support@glitchmachines.com

SETUP:

Due to this pack's significant size, it has been split up into 2 separate parts which you will need to download individually.

All you have to do is to consolidate the contents of the parts into the SAMPLES folder.

SPIRAL.zip already contains the correct folder architecture as well as the BRUSH and MOTOR folders and their contents as shown below:

| 📁 SPIRAL | ▶ | 📁 SPIRAL_DOCS | ▶ | 📁 BRUSH | ▶ |
| | | 📁 SPIRAL_SAMPLES | ▶ | 📁 MOTOR | ▶ |

You simply need to place the contents of part 2 into the SPIRAL_SAMPLES folder until it is fully populated, as shown below:

📁 SPIRAL	▶	📁 SPIRAL_DOCS	▶	📁 BRUSH	▶
		📁 SPIRAL_SAMPLES	▶	📁 MOTOR	▶
				📁 SPRING	▶
				📁 TOOL	▶

Once the folders in the pack are organized in this way, your work is done!

You can then import the .wav files directly into your favorite DAW or sampler.

SPIRAL DESCRIPTION:

Spiral features 400 designed sound effects by Ivo Ivanov, inspired by geometry, mathematics and motion. Spiral comes with 1GB of 24bit 96kHz .wav audio content, which has been crafted to compliment modern music, game and multimedia productions in need of sophisticated, technical and forward-thinking sound effects.

Focused on the concept of cyclical fluctuation, we have activated, captured and processed a diverse selection of springs and motors. You will find an assortment of stylized resonant coil articulations, intricately sculpted power tools, mutated helical objects & motorized toys and abstract dual-perspective mechanical brush tones.

SAMPLE CONTENT OVERVIEW:

BRUSH: Sounds generated by a motorized brush, captured using an unusual recording technique that allows us to hear two perspectives of the sound simultaneously.

MOTOR: Remote controlled vehicle motors, wind-up toys and other sounds derived from motorized objects such as hair dryers, elevators and toy robots.

SPRING: Coiled spring sounds including Slinky, Spring Drum, Zube Tube, toy spring mics and other objects that generate interesting metallic clangs and resonances.

TOOL: Various small hand-held tools, large stationary tools and other motorized equipment including air drills, car lifts and leaf blowers.

After capturing all of the above content, we've used a broad selection of sophisticated audio processing tools to manipulate the recordings in various ways in order to stylize the sounds to fit into various electronic genres and post-production scenarios.

While all of the sounds in this pack have been designed to be production ready, we always recommend experimentation with further processing by means of a variety of other sample manipulation tools such as Polygon or Cataract. Importing our sounds into one of the these tools will allow you to generate a vast variety of fresh material.

If you are interested in obtaining some of the raw source recordings used for these designs, please check out our Found Sounds sample pack Idiom.

Thanks for purchasing Spiral!
