## ABOUT US:

Glitchmachines was established in 2005 by sound designer Ivo Ivanov. For the first 5 years of our brand's existence, we were focused on building handcrafted circuit-bent hardware instruments. We sold a limited number of units through boutique synthesizer retailers Analogue Haven and Robotspeak in California and we custom made instruments for numerous high-profile artists and sound designers. In 2010, we shifted our focus toward creative software plugins and sound effects packs.

## LEGAL:

Piracy directly affects us! We need your support to be able to continue to bring you new products - please do not share our plugins and packs illegally.

## SETUP:

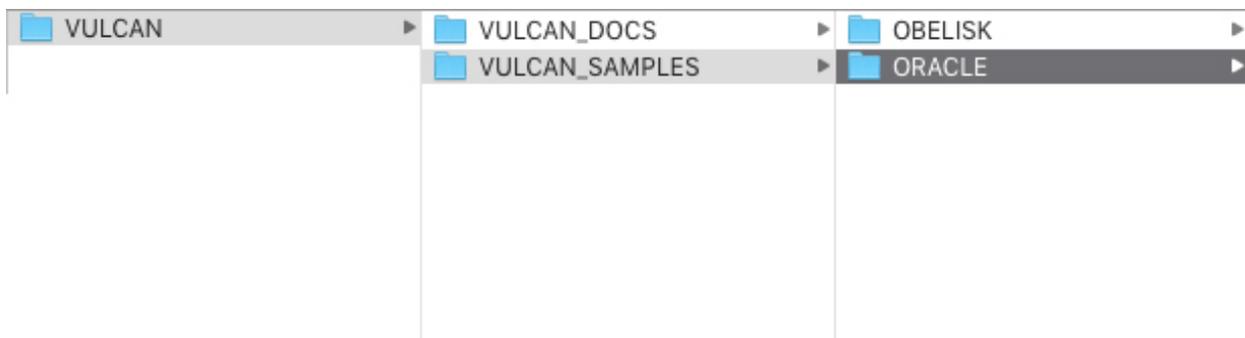

Due to this pack's significant size, it has been split up into 2 separate parts which you will need to download individually.

All you have to do is to consolidate the contents of the parts into the SAMPLES folder.

**VULCAN.zip** already contains the correct folder architecture as well as the OBELISK folder and its contents as shown below:

You simply need to place the contents of part 2 into the VULCAN\_SAMPLES folder until it is fully populated, as shown below:

Once the folders in the pack are organized in this way, your work is done!

You can then import the .wav files directly into your favorite DAW or sampler.

## **VULCAN DESCRIPTION:**

Vulcan features 300 designed sound effects by Ivo Ivanov, inspired by legends of hostile, uninhabitable worlds. Vulcan comes with 1.6 GB of 24bit 96kHz .wav audio content, which has been crafted to compliment modern music, game and multimedia productions in need of sophisticated, technical and forward-thinking sound effects.

The epic spirit of this sample pack is suitable for projects in need of ominous, bold and aggressive material with a sinister technical twist. You will find earth shattering apocalyptic impacts, brutal metallic collisions, dissonant cataclysmic drones, colossal atmospheric contortions and foreboding complex composite effects.

## **SAMPLE CONTENT OVERVIEW:**

At its core, Vulcan is made possible by a staggering collection of field recordings, all of which have been meticulously edited, layered and processed to bring you this collection of vivid sound effects. We recorded natural materials such as stone impacts, metal impacts, fire bursts, electric arcs, low frequency drones, land and air vehicles, bowed and scraped metals, unusual crowd chatter, animal sounds and strange atmospheres.

After capturing all of the above content, we've used a broad selection of sophisticated audio processing tools to manipulate the recordings in various ways in order to stylize the sounds to fit into various electronic genres and production scenarios.

The Vulcan sample pack is comprised of 2 groups of sounds:

**OBELISK:** A variety of vivid and visceral impacts and collisions.

**ORACLE:** A variety of dense and evolving composite effects.

While all of the sounds in this pack have been designed to be production ready, we always recommend experimentation with further processing by means of a variety of other sample manipulation tools such as [Polygon](#) or [Cataract](#). Importing our sounds into one of these tools will allow you to generate totally fresh material.

If you are interested in obtaining some of the raw source recordings used for these designed effects, check out our Found Sounds pack [Idiom](#).
